Visiting Graduate Fellow Program

The Dow Centre

The Dow Centre at the University of Queensland specializes in Techno-economic Analysis (TEA) of sustainable technologies and processes in the areas of chemicals, food, water, and energy.

The Fellowship

The Dow Centre welcomes highly motivated graduate students from universities around the world to apply for Fellowship support to join the Centre team for periods of 1-4 months. The Fellowship will provide the opportunity to work on a high quality techno-economic evaluation related to their area of thesis research. Ideally, the work will result in a chapter of the thesis and a joint publication.

The Fellowship will provide funding for travel and reasonable living expenses for their work at the Centre. Fellows typically start between June and August.

Application

Visiting Fellows are typically graduate students enrolled in Ph.D. programs, however, applications from undergraduates or postdoctoral associates will be evaluated.

Applications may be submitted between January 1st and April 30th. To apply please provide:

• An email of not more than 500 words explaining what project you are currently working on or interested in, and how studying with us might benefit the project and your educational experience.
• A current CV of no more than 2 pages
• Your academic transcript.

Please note that Australian visa conditions will apply to all international students.

For more information, or to submit your application, please contact: Ms Celestien Warnaar at c.warnaar@uq.edu.au
